UX Designer

[Github](#)
[LinkedIn](#)

After being in occupational therapy for 13 years I became mesmerized by the similarities and fresh perspective offered in UX design. Creativity, problem-solving, task segmentation, user flows, and interviews are things I have been doing daily in healthcare and I am so excited to be able to incorporate them in a new and clever way. Being a designer allows me to help people through communicating a story and evoking emotions while utilizing my weird creative stylings.

Skills

Approaches: UX design, UI design, User research, Competitive analysis, User stories, User personas, User testing, Visual design, Branding, Prototyping, Mockups

Tools and Languages: Figma, Sketch, InVision Studio, GitHub, Git, HTML5, CSS

Projects

Caspian | InVision: <https://invis.io/TCWERYBUJP>

- Created a cloud storage app designed to add organization and community to the users experience
- Implemented UX/UI approaches while solving the problems noted in research to incorporate a dramatic story to the branding and design.

Education

Thinkful

Remote

Bloc Design Program

- Learned industry best practices and design process standards with a focus on UX research, Visual design, and frontend development.
- Created and deployed projects while learning new tools and frameworks by collaborating several hours every week with a senior product designer.
